

01-Tutorials

Tutorial 01. Set up a trajectory and topology system

- Load a single trajectory file without topology file:

```
import polyanagro as pag
xtc1 = "../data/0003Ch-C020-002br04/RUN-001/traj_comp.xtc"
trj = pag.Trajectory([xtc1], topfile=filename_tpr, logger=cls.log)
```
